

Jude Koenig - About You Assignment

Basic Info

Major: Computer Science

Future Career: Software Developer

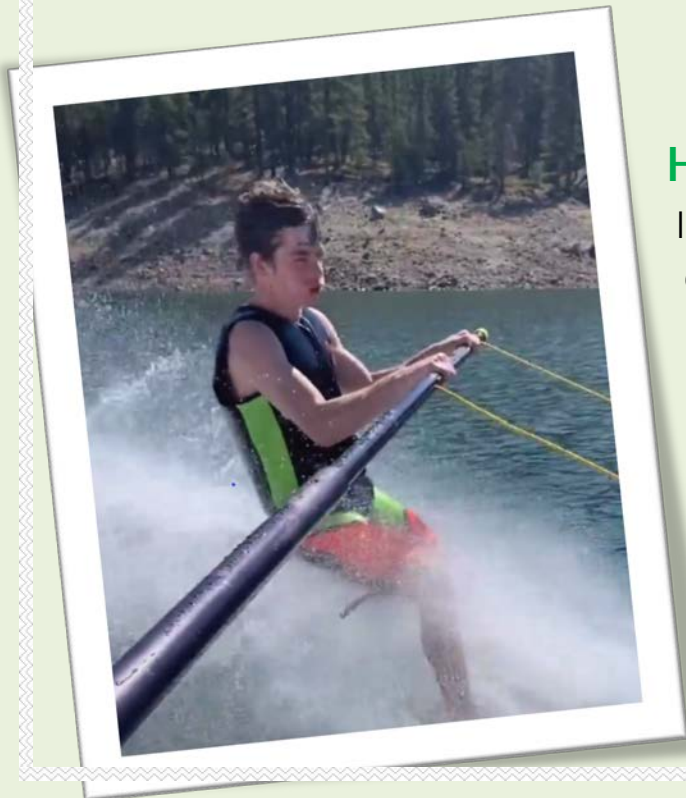

Current Career 1: IT Director

Current Career 2: Researcher for Evolutionary Computer Systems Lab

Technical Knowledge

I have built multiple computers

The key software I currently work with is Office Suite and Adobe for office work and documentation. However my tools for coding are Unity and VS Code.

Hobbies & UNR

I chose UNR because it's a good school at a great price in my opinion and I live in Reno, so I could save even more money.

In terms of hobbies I like to ski: both snow and water, and play video games. I like to code videogames as well and I hope to one day make a successful game of my own, although it doesn't necessarily need to be part of a career.
